

Block of the Month 2024

Blok 7 Origami Pinwheel

What you'll need:

- Pieces of fabric.
The squares should be 3 inches.
This applies to both the background and the blades themselves. You can determine the color combination yourself. 16 squares for the background and 16 for the blades.
- Scissors, rotary cutter, ruler.
- Pins, needles, yarn according to color.

Cut all the squares you need. You will need 16 squares for the blades. Fold the squares in half diagonally and bring one point to the side. Do the same with the other 15. It is best to attach the blades to the background fabric with a pin. Do the same with all the other 15. Then sew all 16 squares. Make 4 squares together. Iron well in between, it is best to unfold the hem, otherwise it will be too thick to stitch. If you have 4 squares, you sew them together to form a large square.

If you don't understand my description, take a look at this [example!](#)
